Project Title

ClubSphere - Esports Club Management System

Short Description

A web-based MVC application designed to centralize and manage university esports club activities, including member registration, team formation, tournament tracking, and financial records.

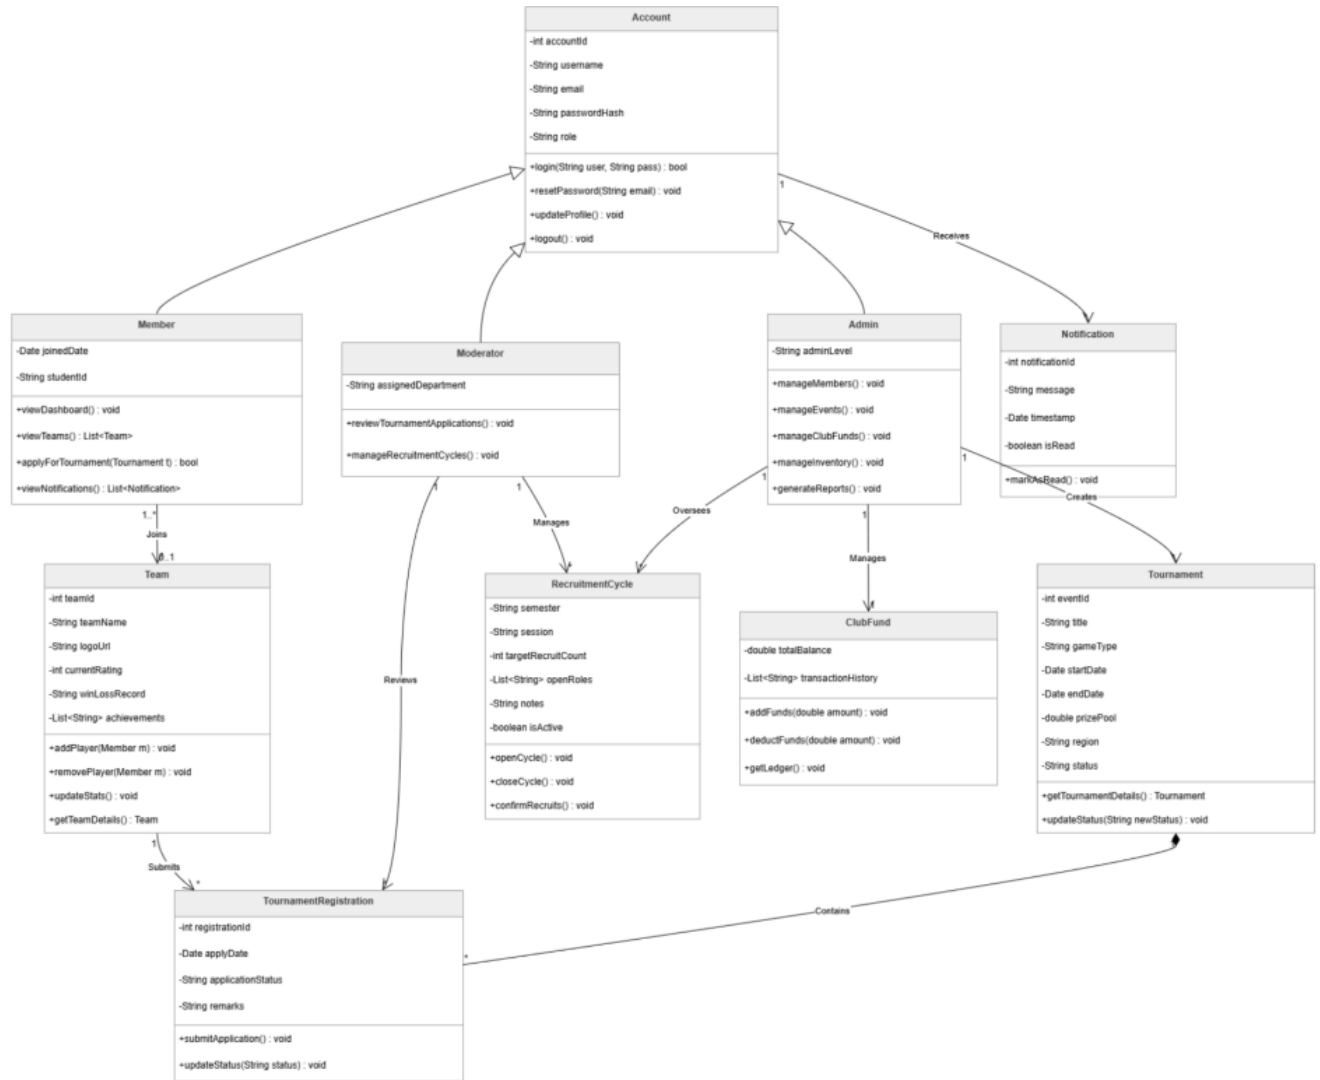

Introduction

Managing competitive gaming events and club operations on university campuses currently involves a scattered approach utilizing social media, messaging apps, and spreadsheets. ClubSphere solves this by providing a unified, role-based platform to handle all esports activities in one place. Built strictly using the MVC (Model-View-Controller) architecture, the system cleanly separates database operations (Models) from the user interface (Views) and logic routing (Controllers). This ensures scalable management of teams, events, and club resources, providing a structured environment tailored specifically for university esports communities.

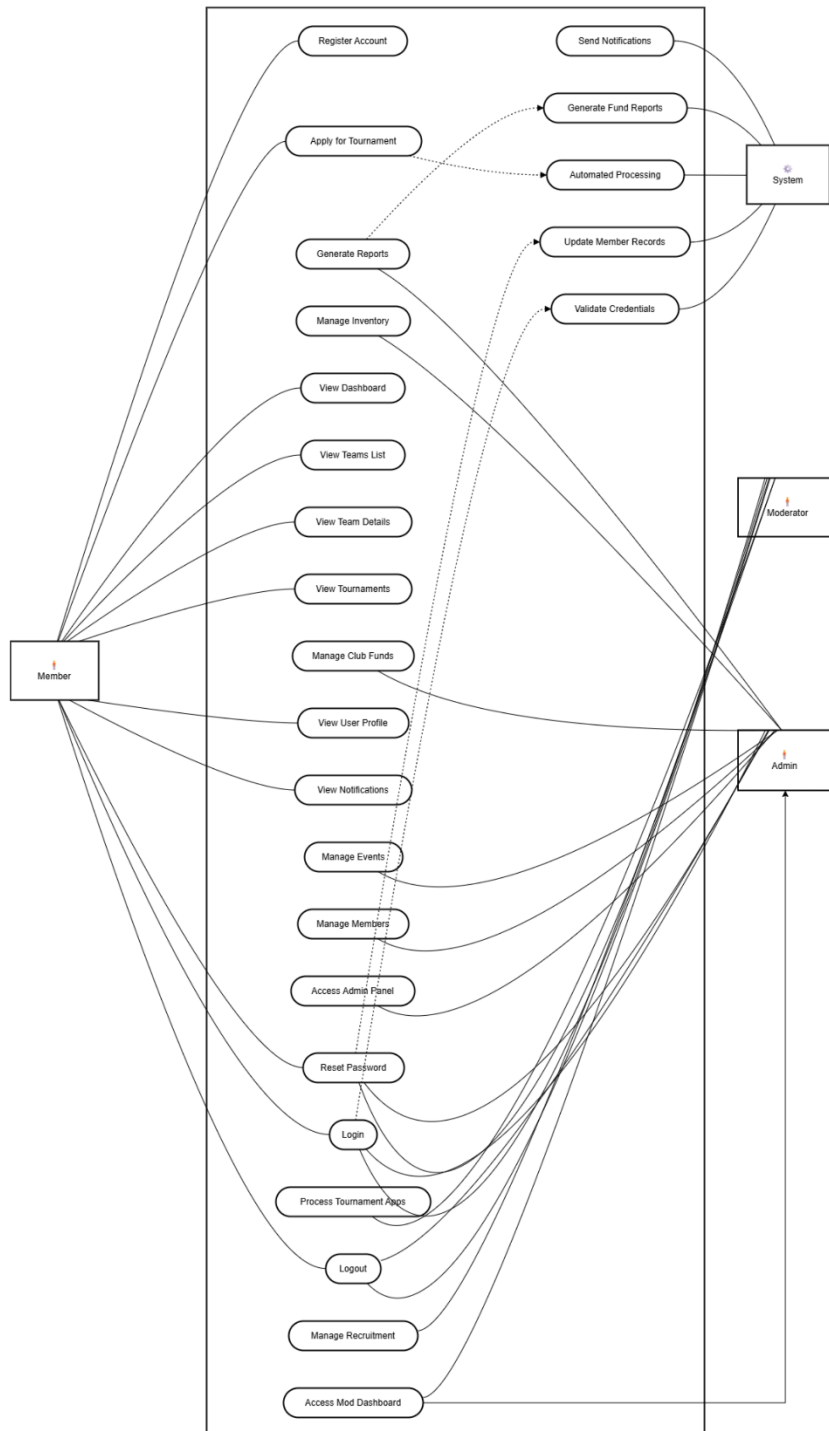

Background Study

As esports continue to grow in universities, managing teams, events, and financial resources using separate tools becomes highly inefficient. This fragmented approach creates confusion, wastes time, and results in disorganized records. By consolidating operations into a single centralized platform, ClubSphere increases accountability through transparent financial and inventory records, improves communication, and simplifies daily operations for administrators, moderators, and general members.

Types of User: 1. Admin 2. Moderator 3. Team Captain 4. General Member

Common Features (Available to All Users)

- **Authentication**
 1. Login to the system
 2. Logout from the system
 3. User registration
- **Account Management**
 1. Change or reset password
 2. Manage profile information (view, edit, delete)
- **Dashboard**
 1. Access a personalized dashboard after login

Specific Features by User Type

- **Features of Admin**
 1. **Membership Approval & Role Assignment:** Exclusively approve or reject incoming membership requests and assign system roles (Admin, Moderator, Member) to specific users.
 2. **Financial Ledger Management:** Record club income (sponsorships, entry fees) and expenses (logistics, equipment), and generate overall club financial summaries.
 3. **Tournament Creation Engine:** Formulate new events by defining game titles, dates, rulesets, and initializing the automated knockout bracket system.
- **Features of Moderator**
 1. **Match Result Verification:** Review match outcome screenshots submitted by players and finalize the official scores to update the live leaderboards.
 2. **Inventory Tracking:** Add new gaming equipment to the database, track which members are using specific items, and update equipment condition statuses.
 3. **Announcement Broadcasting:** Post global news, event updates, and schedule changes directly to the public announcement board
- **Features of Team Captain**
 1. **Roster Assembly & Oversight:** Create a new team entity, invite specific club members to join the roster, and remove inactive players.
 2. **Tournament Registration Submission:** Select an active tournament and submit the finalized team roster for official event enrollment.
 3. **Score Proof Submission:** Self-report match outcomes and upload required post-match screenshot evidence into the system for Moderator review.
- **Features of User4: General Member**
 1. **Gaming Profile Customization:** Update personal gaming preferences, input current in-game rankings, and link external social media accounts.
 2. **Team Join Requests:** Browse the list of existing club teams and submit applications to Team Captains to join a competitive roster.
 3. **Live Bracket & Schedule Tracking:** Access real-time, dynamic views of tournament schedules, knockout brackets, and individual team statistics without administrative edit rights.
